مشروع TwitterDB - دورة

اسم المتدرب: مريم الردادي

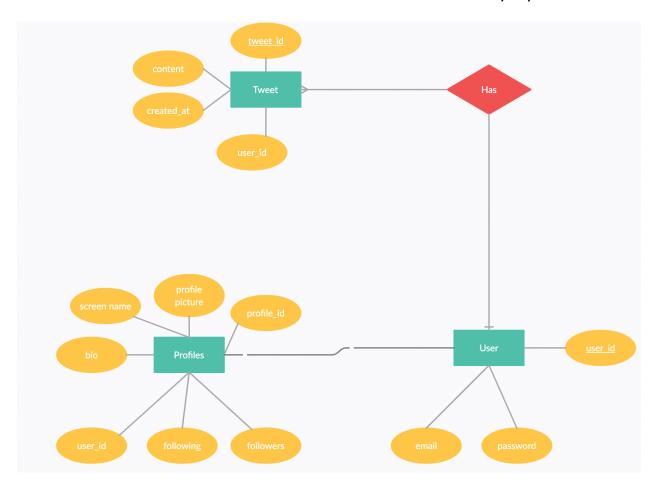

اسم المشرف: غادة المطيري

اسم الفريق: السودة

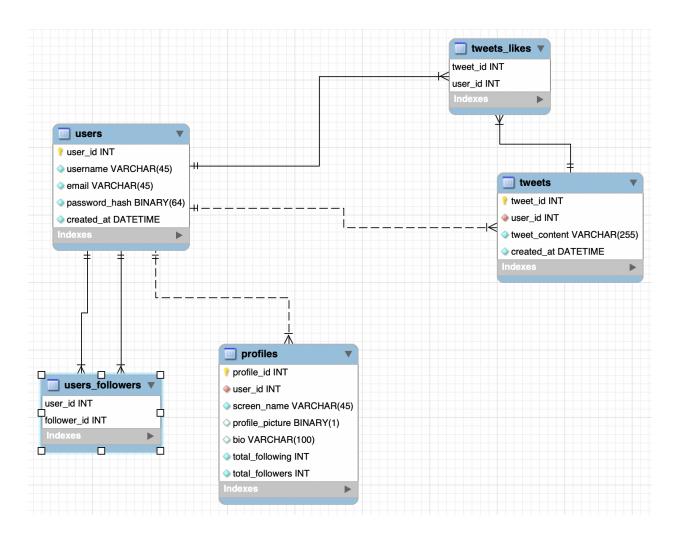

وصف المشروع: مشروع يحاكي قاعدة بيانات تويتر لتطبيق مفاهيم SQL

متطلبات المشروع:

• قبل التطبيق على SQL قم باستنتاج العلاقات والأعمدة ورسمها بواسطة ER diagramثم قم بالتطبيق.

- عند استنتاج العلاقات تأكد من تطبيقها بين الجداول (إضافة.(foreign key
 - ارفاقER diagram
 - Er diagramبعد انشاء الجداول والعلاقات

• انشاء قاعدة البيانات

1 • CREATE DATABASE TwitterDB;

انشاء الجداول المطلوبة مع العلاقات
 انشاء جدول المستخدمين

```
6 • ○ CREATE TABLE users (
7
           user_id
                                INT
                                                 PRIMARY KEY
                                                                 AUTO_INCREMENT,
8
           username
                                VARCHAR(45)
                                                 NOT NULL
                                                                 UNIQUE,
           email
9
                                VARCHAR(45)
                                                 NOT NULL,
           password_hash
                                                 NOT NULL,
10
                                BINARY(64)
11
           created_at
                                DATETIME
                                                 NOT NULL
                                                                 DEFAULT CURRENT_TIMESTAMP
12
          );
10
```

انشاء جدول الملفات الشخصية

```
14 • ○ CREATE TABLE profiles (
15
           profile_id
                                                 PRIMARY KEY
                                                                 AUTO_INCREMENT,
                                INT
16
           user_id
                                INT
                                                 NOT NULL
                                                                 UNIQUE,
17
           screen_name
                                VARCHAR(45)
                                                 NOT NULL,
18
           profile_picture
                                BINARY,
19
           bio
                                VARCHAR(100),
20
           total_following
                                INT
                                                 NOT NULL
                                                                 DEFAULT 0,
           total_followers
                                                NOT NULL
                                                                 DEFAULT 0,
21
                                INT
22
23
           FOREIGN KEY (user_id) REFERENCES users(user_id)
24
          );
```

انشاء جدول التغريدات

```
26 • CREATE TABLE tweets (
27
           tweet_id
                               INT
                                               PRIMARY KEY AUTO_INCREMENT,
28
           user_id
                               INT
                                               NOT NULL,
29
                                               NOT NULL,
           tweet_content
                               VARCHAR(255)
                                               NOT NULL
30
           created at
                               DATETIME
                                                                DEFAULT CURRENT TIMESTAMP,
31
32
           FOREIGN KEY (user_id) REFERENCES users(user_id)
33
          );
34
```

انشاء جدول الاعجابات

```
38 • 🖯
          CREATE TABLE tweets_likes (
           tweet id
39
                                INT
                                                NOT NULL,
40
           user_id
                                INT
                                                NOT NULL,
41
42
           PRIMARY KEY (tweet_id, user_id),
43
           FOREIGN KEY (tweet_id) REFERENCES tweets(tweet_id),
44
           FOREIGN KEY (user_id) REFERENCES users(user_id)
45
          );
16
```

انشاء جدول المتابعين

```
48 • ⊝
          CREATE TABLE users_followers (
49
           user_id
                                                NOT NULL,
                                INT
50
           follower_id
                                INT
                                                NOT NULL,
51

تعبئ[جدول الاعجابات:

```
93 INSERT INTO tweets_likes (tweet_id, user_id)
94 VALUES (5, 2), (1, 8), (35, 4)
```

جدول المتابعين يتم تحديثه من stored procedure user_folower

o تشفير الرقم السري للمستخدم

استخدام دالة MD5 في create_account لتشفير الرقم السري الممرر لل procedure

```
INSERT INTO users (username, email, password_hash, created_at)
VALUES (username, email, MD5(password), curdate());
```

• قم بإنشاء Procedureباسم createAccount سوف نمرر لها بيانات المستخدم و الملف الشخصي ويتم إضافتها لكل الجدولين.

```
